Bayer scholarships: looking for talents!

2014-05-30

Dear Dr. Lubiao,

Pinoneering achievements in science and technology are the basis for success for the innovation company Bayer. This is why the promotion of scientific talent is a key objective of the Bayer Foundation.

With our scholarship programs we help talents from abroad to conduct study projects in Germany in order to develop their career opportunities.

The application period for scholarships 2014/2015 will open soon, and students from the following disciplines are invited to apply:

- Biology, Molecular Biology, Biochemistry
- Biotechnology, Bioengineering, Bioinformatics
- Human and Veterinary Medicine, Pharmacy, Pharmacology
- Physics, Chemistry, Chemical Engineering, Material Science
- Future science teachers
- Agricultural sciences

We are looking for candidates from institutes of higher education who are engaged in their main studies (or at PhD level), and who **intend to come to Germany for a special study project**, e.g. a research work or internship, a special study course, or the clinical phase of their traineeship as a doctor.

Further selection criteria include good study grades, a detailed project plan with confirmation from the receiving institution regarding the planned project needs, and commitment to society – for example in social or cultural projects.
